Circal: Circular Calendar

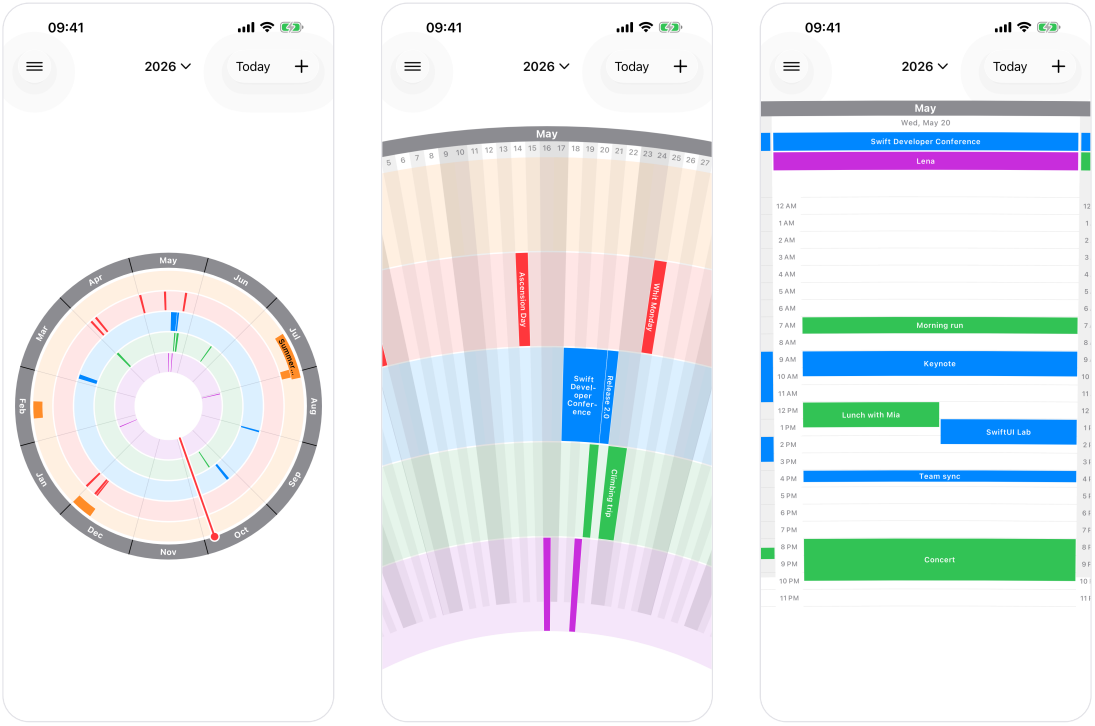
Your whole year in one circle

Developer	Beat Rupp, rupp.digital
Contact	circal@rupp.digital
Website	circalapp.com
App Store	apps.apple.com/app/id6818851555
Platforms	iPhone, including iPhone Duo, and iPad; iOS 17 or later
Languages	English, German
Price	Free with one calendar plus public holidays and other subscribed calendars. All calendars with a one-time in-app purchase, no subscription: $2.99 in the US, €2.99 in Germany and most of the EU.

About Circal

Circal shows the year as a circle. Every calendar on the device becomes a ring around it, so vacations, holidays, trips and busy weeks appear together, and free stretches and overlaps are visible at a glance.

One continuous pinch takes you from the whole year down to a single day: months open up into their days and weekdays, event names appear as soon as there's room, and at the deepest zoom each day becomes a timeline of its hours. Rotating the circle brings any month to the top. Held sideways, the iPhone shows a whole week, every day side by side.



Features

- The whole year as a circle, with each calendar as its own ring, in the order you choose
- Pinch or double-tap from the year to a month, a week and a day
- A whole week side by side in landscape on the iPhone
- Works with the calendars already on the device: iCloud, Google, Exchange and more
- Touch and hold a day or an hour to add an event; tap an event to see or edit it
- Public holiday calendars get a ring too
- Light and Dark Mode

Privacy

Circal reads and changes calendars only on the device. Calendar data is never sent anywhere. There's no account, no ads and no tracking; the app sends only anonymous usage statistics through TelemetryDeck.

About the Developer

Circal is made by Beat Rupp, an independent developer.

In This Press Kit

`Icon/`	The app icon at 1024 × 1024 pixels: light and dark
`Screenshots/`	iPhone and iPad screenshots, without device frames
`Video/`	An app preview: zooming from the year to a day
`Images/`	The App Store header image, and the circle on its own

All images and videos may be used for coverage of Circal.
